

Sunny Patel

Savannah, GA | 912 441 7429 | sunnykp5397@gmail.com | github.com/Sunny53 | sunny53.github.io/

Data analyst with hands-on experience building Python and SQL data pipelines, analytical databases, and BI dashboards. Built a dbt/Snowflake analysis of 99,441 e-commerce orders that quantified a 3.2x increase in late-delivery rates associated with severe weather.

EDUCATION

Bachelor of Science in Information Technology, Data Analysis

2025

Georgia Southern University

Statesboro, GA

TECHNICAL SKILLS

Languages | Python, JavaScript, HTML/CSS, SQL

Data Analysis | Pandas, NumPy, Matplotlib, Seaborn, Plotly, Statistics, Data Cleaning, ETL, dbt, Snowflake

Tools | Power BI, Tableau, Streamlit, Excel (Advanced), Git, Supabase (PostgreSQL)

PROJECTS

Olist Weather-Delay Analysis | Python, dbt, Snowflake, SQL

2026

- Analyzed 99,441 e-commerce orders to quantify a 3.2x increase in late-delivery rate associated with severe weather at delivery destinations, using a fully reproducible dbt-based pipeline
- Built exploratory visualizations in Python (Pandas/Matplotlib) to visualize seasonal delivery trends and identify a geocoding tradeoff affecting data accuracy

NFL Stats Pipeline | Python, Supabase (PostgreSQL), Streamlit, Power BI

2026

- Built ETL pipeline processing 500K+ NFL play-by-play records across 10+ seasons, designing a PostgreSQL database with 12 SQL analytical views for player performance queries
- Developed custom metrics (snap efficiency, consistency scores) and deployed interactive Streamlit dashboards to visualize player trends and leaderboards

EEG Emotion Recognition Research | Python, Pandas, PsychoPy, Emotiv Pro

2023–2024

- Collected and preprocessed 32-channel EEG data from 25 participants across 50 sessions, cleaning datasets and analyzing alpha and beta frequency bands to identify emotional state patterns
- Created visualizations mapping brain activity distributions across emotional stimuli and authored research documentation and a literature review synthesizing 100+ academic papers

WORK EXPERIENCE

IT/Operations Support | Vaishno Inc., Savannah, GA

2015–Present

- Automated daily sales/inventory reporting using Excel formulas and macros, reducing manual processing time by 70% while eliminating calculation errors
- Built an Excel-based lottery tracking system to validate pack sequences and sales volumes, ensuring accurate auditing across ticket-level inventory data
- Diagnosed multi-system issues across POS (Gilbarco), analytics platform (SKUPOS), and network infrastructure, including resolving a loyalty-discount outage by isolating and restarting a failed firewall

IT Intern | MCI (Signify Health), Savannah, GA

2024–2025

- Analyzed call center data including call duration, conversion rates, and script compliance with ObserveAI to identify operational trends and support process improvements

Inventory Technician | Fulfillment.com, Savannah, GA

2015–2019

- Executed WMS migration from Excel to Deposco as part of a 3-person team, reconciling inventory discrepancies between legacy and new systems during live multi-client operations
- Investigated inventory mismatches by cross-referencing physical counts against system data, documenting discrepancies and updating records to maintain accuracy
